EDUCATION

Queen's University, Kingston, ON, Canada Sep 2024 - Apr 2029

Computing, BCMPH

- Introduction to Computing Science I, Introduction to Computing Science II, System-Level Programming, Logic for Computing Sciences, Discrete Structures, Microeconomic Theory I, Macroeconomic Theory I

WORK EXPERIENCE

Amazon Oct 2025 - Nov 2025

Amazon Prime Nano Creator Program (Contract, Part-Time)

- Selected for a competitive 7-week Amazon creator program from a national applicant pool
- Managed multiple content deliverables simultaneously while meeting strict deadlines and bran requirements
- Analyzed engagement, retention, and performance metrics across 8+ campaigns to identify trends and optimize future content strategy.
- Produced content generating over 100,000 views, using data-driven decision making to improve audience reach and engagement
- Collaborated with Amazon stakeholders and program coordinators to ensure project objectives met on schedule

Scarborough Bluffs Tennis Club Apr 2025 - Jun 2025

Assistant Tennis Coach

- Coached and supervised 10+ youth and adult players in tennis fundamentals, drills, and match play
- Designed and led engaging training sessions to maintain high participation and support skill development across all levels
- Adapted coaching techniques to suit both beginner and intermediate adult players, improving consistency and game strategy

LEADERSHIP EXPERIENCE

Queen's Women In Computing Sep 2025 – Apr 2026

Vice-Chair, Community (Kingston ON)

- Led and managed a team to plan and execute monthly community-building and networking events for women in computing
- Coordinated event logistics, stakeholder communication, and task delegation to ensure successful program delivery
- Tracked participation and feedback to improve engagement and enhance future community initiatives

First-Year HackHer Representative (Kingston ON)

- Promoted participation in hackathons and computing events, increasing engagement among first-year students
- Acted as a liaison between new members and the organization, encouraging involvement and community building

LayLow x Naveini Matcha Campaign Apr 2024 - June 2024

- Initiated and led a fundraising collaboration with Lay Low Cafe, managing campaign planning, stakeholder communication and execution
- Promoted the campaign through social media, generating 20, 000+ views and driving strong student engagement
- Raised and donated $1700 to Sexual Assault Centre Kingston while tracking campaign performance and impact

PROJECTS

Makeup Sorting Algorithm Visualizer

- Developed an interactive Python application to demonstrate sorting algorithms using cosmetic products as data elements
- Implemented core sorting algorithms (e.g., selection sort, merge sort) to visualize step-by-step execution
- Designed and tested program functionality to improve usability, accuracy, and algorithm visualization

TECHNOLOGICAL SKILLS

Java, Python, C, C++, Bash, Git, GitHub, VS Code, Debugging, Testing, Technical Documentation, Data Analysis
